Board of Directors

Corporate Office  
Ten Amica Center Boulevard  
Lincoln, RI 02865-1167

I, Brian Lemek, am an Assistant Vice President at Amica Life Insurance Company and am a member of the American Academy of Actuaries in good standing. I meet the Academy qualification standards for issuing this opinion. I have reviewed the actuarial assumptions and actuarial methods used in determining non-guaranteed elements for the individual life insurance and annuity policies of Amica Life Insurance Company ("the Company") used for delivery in the United States. The non-guaranteed elements included are those:

- i. paid, credited, charged or determined in 2020; and
- ii. authorized by the Company to be illustrated on new and existing business during 2020.

My examination included such review of the actuarial assumptions and actuarial methods of the underlying basic records and such tests of the actuarial calculations, as I considered necessary. In my opinion, the nonguaranteed elements described above have been determined in accordance with Actuarial Standards of Practice issued by the Actuarial Standards Board applicable to the determination of nonguaranteed elements, except as described above.

My review relates only to the non-guaranteed elements identified herein, and I do not express an opinion on the Company's financial statements taken as a whole.

This opinion has been prepared solely for the Board and the management of the Company and for filing with insurance regulatory agencies of states in which the Company is licensed, and is not intended for any other purpose.

Determination Procedures

Statement of policy regarding the determination and redetermination of non-guaranteed charges and benefits for life insurance and annuity contracts.

This is a statement regarding changes to contractual non-guaranteed elements with respect to solvency concerns, marketing goals, and profit objectives. Nothing in this statement is intended to contravene contractual obligations or regulatory and legal requirements.

With regard to universal life, traditional permanent and term life insurance premiums, the Company will review the premium rates at least once every five years to determine whether or not a change should be made. For traditional plans, the Company may change such rates as often as each policy anniversary. For universal life, changes to COI will be made on month anniversary. Any change the Company makes will be based on the Company's expectations as to future mortality, persistency, expenses and investment earnings (except for universal life) experience. For universal life and annuities, the interest credited rate is reviewed at least once a month, but target spreads remain constant. For the block of annuities currently being sold, we require that credited interest rates are also up to 75 bps higher than new money rates to ensure that profit objectives are achieved with an acceptable amount of risk. An actuarial review is performed whenever changes are made to anticipated spreads.

Any change will be uniformly made for all policies of this type for all insureds of the same age, sex, face amount and rate class; and will be in accordance with procedures and standards on file with the department of insurance. The Company will notify policyholders, in writing, at least twenty days before the policy anniversary on which the premium rates will be changed.

If the premium rates change, the new rates may be higher or lower than those previously in effect. However, the rates will never exceed the guaranteed premium or cost of insurance rates in the policy.

No changes will be made due to changes in the health or occupation of any one insured.

In determining possible changes, historical premiums or charges, credited interest (if any), and actuarial assumptions will be used to project test cells to the review date. Expected experience will be relied on to revise actuarial assumptions for subsequent years. Premiums or charges will be solved for to maintain original profit objectives. The decision to change premiums and charges, without recouping any past losses, involves profit objectives, solvency, and marketing objectives.

The Company profit objective is to achieve a present value of book profits that is at least five to seven percent of the present value of premium measured over a thirty year period. The breakeven objective is seven to ten years.

With regard to solvency, each product should contribute to capital and surplus at a rate commensurate with risk and dependent on emergence of profit. Actuarial measures of asset risk and insurance risk will be employed to determine minimum levels of capital and surplus.

Exhibit 5, Question 3

Answers to Interrogatories

1. Yes. The current interest rates for annuities changed during the year as described below. Values on a current and guaranteed basis are always illustrated for annuities and universal life.
2. Yes. Current interest rates for annuities and universal life were reviewed each month and were set in accordance with the Company's policy. During the year, new money credited interest rates on the FPDA ranged from 1.75% to 3.60%. For SPDA products new money credited interest rates ranged from 1.75% to 3.70%. The renewal credited rates on annuities ranged from 1.50% to 3.00%. For some annuity contracts, the guaranteed rate was higher than our declared interest rates in which case those contracts received the guaranteed rate. For the universal life product, the rate was reviewed each month, but the credited rate remained at 4.50%, which is the guaranteed rate, throughout the year.
3. In regards to legacy inforce annuities, the changes did not vary from the policy and procedures last reported. For the block of FPDA and SPDA that is currently being sold, we have targeted the credited rates using an interest rate spread of 75 to 100 basis points from current earned rates for the portfolio backing the new block. However, due to the extreme circumstances for long-term investment yields during 2020, we also needed to implement a minimum target spread of up to 75 bps vs new money rates in order to make sure that the block can support risk and profit objectives.
4. No, the anticipated experience factors are based on best estimate assumptions.
5. Anticipated investment income experience factors are based on an average portfolio approach. These averages vary by line, based on the assets allocated to that line. Segments for annuities, universal life, and other business have been established. Assets are allocated to segments at the end of each year. The factors are based on future expectations for each segment.
6. Functional cost analyses are the basis for the allocation of expenses by line and within line. Mortality, lapse, and premium persistency experience is monitored annually and compared to our expectations and to published industry data. Experience studies analyze experience for the various product lines separately.
7. No.
8. None.

## NOTES TO FINANCIAL STATEMENTS

### Note 1 - Summary of Significant Accounting Policies and Going Concern

#### A. Accounting Practices

The accompanying financial statements of Amica Life Insurance Company (the Company) have been prepared on the basis of accounting practices prescribed or permitted by the State of Rhode Island.

The State of Rhode Island requires insurance companies domiciled in the State of Rhode Island to prepare their statutory financial statements in accordance with the National Association of Insurance Commissioners' (NAIC) *Accounting Practices and Procedures Manual* subject to any deviations prescribed or permitted by the State of Rhode Island Department of Business Regulation Insurance Division. The Company has no state prescribed adjustments to report; however, the Company does have the state permitted practice as detailed below.

Effective January 1, 2014, the Rhode Island Department of Business Regulation Insurance Division approved a permitted accounting practice to allow the Company to record directly to surplus the change in XXX reserves that is above the change in the reserves calculated on a discounted cash flow basis instead of recording the change in XXX reserves directly to net income as required by NAIC statutory accounting practices (NAIC SAP). This practice has no effect on the surplus of the Company nor its reserve position, as the Company continues to establish reserves in accordance with Rhode Island Regulation 93. If the change in XXX reserves were recognized in accordance with NAIC SAP, net income would have decreased by \$12,991,451 and \$13,720,534 and there would be no change in surplus as of December 31, 2020 and 2019, respectively.

A reconciliation of the Company's net income and capital and surplus between NAIC statutory accounting principles (NAIC SAP) and practices prescribed and permitted by the State of Rhode Island as of December 31, 2020 and 2019 is shown below:

No regulatory action or risk-based capital event would be triggered under NAIC SAP or permitted practice accounting.

#### B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses. It also requires estimates in the disclosure of contingent assets and liabilities. Actual results could differ from these estimates.

#### C. Accounting Policies

The Company recognizes life premiums over the premium paying period of the related policies. Annuity considerations are recognized as revenue when received. Expenses incurred in connection with acquiring new insurance business including acquisition costs are charged to operations as incurred.

In addition the Company uses the following accounting policies:

1. Short-term investments are stated at cost or amortized cost.
2. Bonds not backed by other loans are stated at amortized value using the scientific method.
3. Common stocks are stated at market value. Other-than-temporary declines in the fair value of a common stock are written down to fair value as the new cost basis and the amount of the write-down is accounted for as a realized loss.
4. Preferred stocks are stated at cost.
5. First lien mortgage loans on real estate are reported at the unpaid balance of the loan.
6. Loan-backed bonds and structured securities are valued at amortized cost using the retrospective method (or a method which approximates the retrospective method).
7. The Company has no investments in subsidiaries, controlled or affiliated companies.
8. The Company's other invested assets in unaffiliated joint venture interests are carried at the Company's share of GAAP equity of the fund.
9. The Company does not hold or issue derivative financial instruments.
10. The Company does not anticipate investment income as a factor in premium deficiency calculations.
11. The Company does not write Accident and Health insurance.
12. The Company's capitalization policy includes a prepaid expense threshold of \$50,000, capitalization of qualifying expenses associated with projects in excess of \$50,000, and capitalization of internal labor costs on strategic projects to the extent

## NOTES TO FINANCIAL STATEMENTS

they qualify. The policy maintains the \$5,000 de minimis limitation on capitalizing individual items for projects under \$50,000.

In 2019, the Company updated its capitalization policy to include the published revisions to SSAP No. 16R as it relates to implementation costs of cloud computing service contracts. See Note 2 for further information.

13. The Company has no pharmaceutical rebate receivables.

### D. Going Concern

Management's review of relevant conditions and events, considered in the aggregate, indicate that it is probable that the Company will be able to meet its obligations as they become due within one year after the date that the financial statements are issued.

### **Note 2 - Accounting Changes and Corrections of Errors**

#### A. Accounting Changes and Corrections of Errors

In April 2019, the Statutory Accounting Principles Working Group published revisions to SSAP No. 16R which adopted with modification ASU 2018-15, "Customer's Accounting for Implementation Costs Incurred in a Cloud Computing Arrangement That is a Service Contract." SSAP No. 16R allows for the capitalization of implementation costs from a cloud computing service contract as non-operating software. The Company has adopted these changes retrospectively as of January 1, 2019 and recorded capitalized cloud computing service implementation costs of \$7,213,001 and \$13,299,566 during 2020 and 2019, respectively.

In June 2019, the Company discovered an error relating to allowances owed to one of its reinsurers stemming from incorrect allowance pointers taken between the years 2014 and 2018. This error resulted in an overstatement of premiums as well as an overstatement of net income by \$940,236 during those years. As a result, surplus (Liabilities, Surplus and Other Funds Page, Line 37) was overstated by \$940,236 at December 31, 2018. Line 12 of the Liabilities, Surplus and Other Funds Page and Line 5304 of the Summary of Operations Page were adjusted in 2019 to correct the error of \$940,236.

In November 2019, the Company discovered an error relating to prepayment assumptions necessary to amortize mortgage-backed securities and collateralized mortgage obligations. While maturity dates and bond factors were updated on a monthly basis, prepayment assumptions were not automatically recalculated within the investment accounting system. The Company transitioned to ICE Data Services in November 2019 in order to obtain updated prepayment information in accordance with SSAP No. 43R. The error resulted in the understatement of amortized cost and net investment income in previous years, primarily due to overstated premium amortization. As of December 31, 2018, Bonds (Assets, Line 1) and Net Investment Income (Summary of Operations, Line 9) were understated by \$883,742. Line 15 of the Exhibit of Net Investment Income Page was adjusted in 2019 to correct the gross amount of the error of \$883,742, and Line 18.1 on the Assets Page was adjusted to correct the net of tax error of \$698,156. The \$185,586 tax impact is reflected in the 2019 Federal income tax recoverable.

Effective December 15, 2019, the Company amended its vacation policy resulting in a need to record a compensated absence accrual as of December 31, 2019 and subsequently thereafter. At December 31, 2019, the Company recorded a liability of \$1,053,000, of which \$209,000 related to current year expense. The remaining \$844,000 related to prior periods and was charged to policyholder surplus. In order to ensure this change was accurately reflected in Exhibit 2: General Expenses, the Company restated Line 11 – General Expenses unpaid December 31, prior year.

In December 2020, the Company completed a reserve strengthening of the payout annuity line of business which was effective as of January 1, 2020. The reserve strengthening qualifies as a change in valuation basis under SSAP No. 51R "Life Contracts" and SSAP No. 52 "Deposit-type Contracts". At December 31, 2020, the Company increased the reserves for life and annuity contracts by \$17,550,690 and the liability for deposit-type contracts by \$9,836,452. The combined increase of \$27,387,142 was recorded directly to surplus in accordance with the guidance.

#### A. Mortgage Loans, including Mezzanine Real Estate Loans

1. The Company has invested in twenty-six commercial mortgage loans at December 31, 2020. The maximum and minimum lending rates for mortgage loans originated during the current year were 3.5% and 3.3%, respectively.
2. The maximum percentage of any one loan to the value of the security at the time of the loan, exclusive of insured or guaranteed or purchase money mortgages, was 70.5%.

**B. Debt Restructuring**

**C. Reverse Mortgages**

**D. Loan-Backed Securities**

1. Prepayment assumptions for single-class and multi-class mortgage-backed and asset-backed securities were obtained from broker-dealer survey values, nationally recognized data services or internal estimates. The Company uses ICE Data Services to update prepayment assumptions quarterly. The Company used ICE Data Services to determine the market value of its loan-backed securities. In 2020, there were no changes from retrospective to prospective methodologies.

2-3. The Company did not write down any loan-backed securities during the period.

4. All impaired securities (fair value is less than cost or amortized cost) for which an other-than-temporary impairment has not been recognized in earnings as a realized loss (including securities with a recognized other-than-temporary impairment for non-interest related declines when a non-recognized interest related impairment remains):

**NOTES TO FINANCIAL STATEMENTS**

a. The aggregate amount of unrealized losses:

1. Less than 12 Months	<u>\$ 338,578</u>
2. 12 Months or Longer	<u>\$ 155,881</u>

b. The aggregate related fair value of securities with unrealized losses:

1. Less than 12 Months	<u>\$ 45,868,166</u>
2. 12 Months or Longer	<u>\$ 13,935,543</u>

5. All loan-backed and structured securities in an unrealized loss position were reviewed to determine whether other-than-temporary impairments should be recognized. The Company asserts that it has the intent and ability to hold these securities long enough to allow the cost basis of these securities to be recovered. These conclusions are supported by an analysis of the underlying credit of each security. Unrealized losses are primarily attributable to faster prepayment speed assumptions and modestly wider spread levels. It is possible that the Company could recognize other-than-temporary impairments in the future on some of the securities, if future events, information and the passage of time cause it to conclude that declines in the value are other-than-temporary.

## D. Reconciliation of Federal Income Tax Rate to Actual Effective Rate

The provision for Federal income taxes incurred is different from that which would be obtained by applying the statutory Federal income tax rate to income before taxes. The significant items causing this difference are as follows:

#### I. Impact of Medicare Modernization Act on Postretirement Benefits (INT 04-17)

##### 1. Recognition of the existence of the Act

The Medicare Prescription Drug, Improvement and Modernization Act of 2003 (the Act) was signed into law in December of 2003. The Act includes the following two new features to Medicare Part D that could affect the measurement of the accumulated postretirement benefit obligation (APBO) and net periodic postretirement cost for the plan:

- a. A Federal subsidy (based on 28% of an individual beneficiary's annual prescription drug costs between \$435 and \$8,950 for 2020), which was not taxable before 2013, to sponsors of retiree healthcare benefit plans that provide a prescription drug benefit that is at least actuarially equivalent to Medicare Part D; and
- b. The opportunity for a retiree to obtain a prescription drug benefit under Medicare.

The benefits provided by the Plan are actuarially equivalent to Medicare Part D under the Act. As a result, the effects of the Act on accumulated postretirement benefit obligation are reflected in the financial statement.

##### 2. Effects of the Subsidy in Measuring the Net Postretirement Benefit Cost

For fiscal year 2020, the effect of the Act was a \$34,814 increase in the Company's net postretirement benefit cost for the subsidy related to benefits attributed to former employees. This includes a \$5,379 decrease to the interest cost, a \$40,193 increase in the amortization of prior service cost for non-vested participants, and no change in the amortization of gain or loss.

##### 3. Disclosure of Gross Benefit Payments

The Company's gross benefit payments for 2020 were \$522,231 including the prescription drug benefit. The 2021 gross benefit payments are estimated to be \$580,000. These inputs comprise the following fair value hierarchy:

Level 1 – Observable inputs in the form of quoted prices for identical instruments in active markets.

Level 2 – Observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities, quoted prices in markets that are not active or other inputs that are observable or can be derived from observable market data for substantially the full term of the assets or liabilities.

Level 3 – One or more unobservable inputs that are supported by little or no market activity and are significant to the fair value of the assets and liabilities. Level 3 assets and liabilities include financial instruments whose value is determined using internal models, as well as instruments for which the determination of fair value requires significant management judgement or estimation.
